

Peter Okutoyi has a mental problem which requires specialized attention.

3. ENVIRONMENT- Reduce desertification through sound agro forestry management

CURRENT ACTIVITIES.

We are running orphan children support projects in Western Kenya with a total number of 1200 orphans at the following centres

Kakamega	Lugari	Bungoma	Butere/ Mumias
400	200	400	200

Julius Biketi (centre) with his group of people living with HIV / AIDS at their project site in Bungoma District.

FUTURE PLANS.

We plan to set up a resource centre to make information easily accessible in order to link the children with possible benefactors from a central point. We are training women groups on sound management of income generating activities to empower the community economically in order to sustain the project in the long term.

A School girl in Butere / Mumias in need of shelter among other needs

FUNDRAISING.

We project to raise US\$ 7 M in a period of 10 years in order to implement the projects by 2015 through donations from individuals and organizations, funding of projects by the donor community and provision of voluntary services by individuals and organizations at both local and international level. Donations of any amount in form of material or cash will be appreciated . We are also appealing for funding to meet the cost of building and equipping a resource centre estimated at US \$ 300,000

INTRODUCTION.

We are a non governmental organization participating in community development, currently in Western Kenya, in collaboration with other stakeholders. Currently we are running a project to support orphans and vulnerable children in a bid to meet their basic needs including clothing, food, school uniforms, shoes, school bags, beddings, medication, shelter and Secondary school fees (Primary Education is currently free).

Susan Khavetsa with her orphaned Grandchildren under her care in Lugari District

VISION:

we envisage a country whereby the citizens will be able to access educational information and health care services by the year 2015 in order to positively contribute to the National development goals.

Precious Weche—a needy orphan from Khwisero in Butere / Mumias District

MISSION:

Hope on Africa Programme was formed in order to reverse the further spread rate of HIV/AIDS pandemic and reduce poverty through education.

Ireen Mukisa lost both parents. She has a health problem, malnourished and requires special medical care

PROBLEM STATEMENT.

Africa is currently home to 95% of the world's 13 Million children orphaned as a result of AIDS. At this rate the numbers will rise to at least one third of African children being orphaned by the year 2010.

Orphans in Africa suffer recurrent psychological trauma, starting with the illness and deaths of their parents followed by cycles of poverty, malnutrition, stigma, exploitation, and often abuse. The combination of increasing number of orphans, decreasing number of caregivers and weakened extended families, together with poverty, means that orphans are more likely to fall through traditional safety nets. We can only show love to these children by "seeing and doing something about their need."

Sorophine Mmboga Kato Lost both parents and lives with the grandparents in abject poverty in Lugari District.

OBJECTIVES.

1. **EDUCATION**-Assist the orphan and vulnerable children get education in order to realize the possibility of productive employment, minimizing their risk of being exploited and of themselves becoming infected with HIV. Access to good quality education will have a profound and lasting impact on the economic and social development of the whole country and would do much to alleviate the impact of HIV/AIDS on orphans and vulnerable children. Existing evidence / data shows that Kenya has a population of 1.78 M orphans aged 0-14 years in need of assistance.

Washington Alembi Lusuli lost both parents and lives with the grandfather. He is bright with a talent that needs to be nurtured.

2. **HEALTH** - supplement government services in provision of health care services to the community e.g. reduce HIV/AIDS infection rate and give treatment to those infected to prolong their lives
